

Everyday Materials

Year 2 Science Knowledge Organiser Summer Term 2023

This term, in Science, we will learn about the uses of everyday materials including wood, plastic, metal, glass, brick, paper and cardboard. We will then go on to compare the suitability of different everyday materials for different purposes. We will explore how objects made of some everyday materials can change shape and how the recycling process is able to reuse some everyday materials numerous times. We will take part in activities including, discussions, debates, sequencing and go on a local walk working scientifically to identify the uses of everyday materials in the local area.

Examples of Everyday Materials

Key Vocabulary

materials wood
 plastic metal paper
 waterproof properties
 absorbent stretchy
 opaque glass
 twist bend squash

Examples of Everyday Materials

Have a look at these different materials...

If you were going to sort them into two groups, how would you do it?
