Writing (Hieroglyphics)

In **ancient Egypt**, scribes wrote on papyrus. Papyrus was a thick type of paper made from reeds that grew along **the Nile**. Scribes were mostly men who went to a special school to learn to write.

Scribes wrote using **hieroglyphs**. **Hieroglyphs** were used for religious texts and inscriptions on statues and **tombs**. They were also used for counting crops and animals so that the right taxes could be taken.

Did You Know...?
The Rosetta Stone was discovered in 1799. It was written in **hieroglyphs** and two other languages, including **ancient Greek**, which language experts could still read. They translated the **hieroglyphs** by comparing the languages. It took 20 years to translate all the text into modern language.

The Nile

Life revolved around **the Nile**. Every year, it flooded and left behind a black silt that enriched the soil for growing crops. The river was also used to **irrigate** fields in other areas.
